

RAMS CLEANING SERVICES

High-level Cleaning and
Sanitisation Process Against
COVID-19

The **Health and Safety** of our clients and our team members is our **NUMBER ONE** priority. It is our role to keep your premises at the highest level of cleanliness and hygiene, allowing your staff and workplaces to function as best as normal. Therefore, to help prevent the spread of **Covid-19** in workplaces, **RAMS Cleaning Services**, have not only increased their cleaning services but are also providing extra cleaning supplies and additional sanitisation products and services for their clients as needed.

Please Note: These guidelines are focused on commercial or non-commercial areas, community, non-healthcare facilities, schools, offices, restaurants, day-care centres, community centers, etc. We clean all hard (non-porous) and soft (porous) surfaces, all touch points, electronics, furniture, and other areas per the client's requirement. In all levels, we remove dust or any waste or debris followed by deep cleaning using EPA-approved chemicals.

RAMS Cleaning Services have put in place a **High-Level Sanitisation Process** against the Coronavirus. This solution is ideal for healthcare facilities, as well as non-health care premises such as schools and offices that may have suffered a case of **Covid-19**. This unique cleaning service is also an ideal precautionary measure to help stop the spread of the disease.

Three Levels of Sanitising and Infection Control for RAMS Cleaning Services Customers

Level 1

- Cleaning and disinfecting all touch points at a site with appropriate PPE including door handles, switches, taps, doors, and floors
- Complete standard clean of premises
- No closure required and work is carried out at the client's requested interval or frequency
- All touchpoints sprayed with sanitiser
- Floors and soft furnishings vacuumed

Level 2

- Cleaning and disinfecting all Level One areas and everything up to two (2) metres high including walls, glass, and under furniture with full PPE
- Includes entrance, foyer, reception, office areas, meeting rooms, stairs, and corridors
- Kitchen and lunchrooms are also covered
- Toilet areas included
- With extra precaution taken if the area is possibly high-risk or infected with bacteria or virus
- Involves closing off areas visited or frequented by people

Level 3

- Cleaning and disinfecting using a high-level procedure that involves fogging with suitable chemicals
- Dry fogging process with rooms airtight and workers in full PPE gear
- Surface cleaning based on industry-grade guidelines
- Extracting all fog and toxic gas from the room
- Equipment and personnel decontamination with professional equipment
- Involves assistance from Advance International Cleaning Systems (NZ) Ltd for sanitising and infection control

Cleanliness plays a huge role in the fight against Covid-19. Coupled with prompt disinfection, thorough cleaning, and other techniques, we can effectively stop SARS-CoV-2 and other viruses from spreading.

RAMS Cleaning Services can offer this top-tier level of cleaning and sanitising needed to **stop** the spread of Covid-19. Following the rules set by the New Zealand Government, our agile team stays vigilant. We are ready to adapt and implement the latest safety and cleaning protocols recommended by global experts.

A fogging disinfection machine uses a 'dry' mist to sanitise whole rooms, vehicles, and the surfaces of equipment in a matter of minutes, with no residue or odours. A fog machine provides a 99.9999% kill rate for a variety of organisms while still being green, eco-friendly, and chemical residue-free.

Our Level 3 Cleaning is a Scientifically Backed Process:

①

Fogging using **EPA-approved** chemicals for maximum effectiveness and coverage for all areas.

②

Surface cleaning and sanitising with industry-graded sanitisation products such as **Bio Kleen**, **Hygiea Clean**, and **Germshield Surface Sanitiser** for all frequently touched surfaces and touch points.

③

Decontamination process that applies to the worker and their equipment. We work with **Advance International Cleaning Systems (NZ) Ltd** to deliver services to customers at this level.

Additional Hygiene and Sanitary Services We Can Offer:

- Hand sanitiser stations, with appropriate dispensers
